# The Programming Model of Java EE 6

Pete Muir

Principal Software Engineer, JBoss

06 October 2010

# Agenda

- Introduction
- Demo & Tech Deep Dive
- Conclusion

# Java EE 6: Goals

- Extensibility
  - Allow more components to be standalone (EJB 3.1)
- Profiles
  - Subsets of “full” EE platform
  - Web Profile
- Pruning
  - CMP, JAX-RPC, JAXR, JSR-88 are “pruned” in EE6
- Technology Improvements

# Java EE 6: Newcomers

- Managed Beans (part of JSR-316)
- Contexts and Dependency Injection - JSR-299
- Bean Validation - JSR-303
- JAX-RS (RESTful Web Services) - JSR-311

# Java EE 6: Notable Updates

- Servlet 3.0
  - Easier configuration
- JPA 2.0
  - Type-safe Criteria API
  - Extra mappings
- EJB 3.1
- JSF 2
  - Ajax
  - Easy component creation
  - Bookmarkable URLs
  - Templating

# Web Profile

- Persistence

- JPA 2.0
- JTA

- Presentation

- JSF 2.0
- Servlet 3.0

- Component model

- EJB 3.1 Lite
- Bean Validation
- CDI (JSR-299)

# CDI: Essential Ingredients

- Bean types
- Qualifiers
- Scope
- Alternatives
- EL Name (optional)
- Interceptors and decorators
- Implementation

# EJB 3.1: Key updates

- No-interface views
- War deployment
- Async, “natural” timers
- Singletons

# Agenda

- Introduction
- Demo & Tech Deep Dive
- Conclusion

# Concepts

- Managed Beans
- Producers
- Scopes
- JSF integration
- Persistence
- Validation
- Pooling
- Singletons & Startup
- Events
- Declarative Concurrency
- Timers
- Servlet
- Criteria API
- Decorators

# Agenda

- Introduction
- Demo & Tech Deep Dive
- Conclusion

# The EE 6 Story

- Start simple with managed beans
- Add in persistence and validation
- Add in EJB services like pooling, declarative TXs, timers to provide “enterprise features”
- Producers replace factories (loose coupling)
- Add in CDI services like events, decorators to decrease coupling

# What else have we learnt?

- Bean Validation
  - DRY
- Criteria API
- JSF 2
  - Templating
  - Tight EE integration
- Servlet 3

# Availability

- Java EE 6 is final
- JBoss AS M3
  - CDI
  - most of EJB3.1
  - Servlet 3
  - JSF 2
  - Bean Validation
  - JPA 2

# Q&A
